

The Government of Newfoundland/Labrador now provides substantial grants to property owners who complete energy efficiency retrofits.

**Here's how it works:**

1. Call **The Energy Guy** to perform an energy evaluation of your home. The cost of the first evaluation is \$300<sup>+HST</sup> (The Province will subsidize \$200<sup>+HST</sup> **so your cost is \$100<sup>+HST</sup>**).
2. Select the improvements from your home energy action checklist.
3. Implement some or all of the recommended energy upgrades prior to March 31<sup>st</sup>, 2011.
4. Call our office to arrange your post-retrofit evaluation so that your grant application may be completed and submitted to Natural Resources Canada. The cost of the second evaluation is \$150<sup>+HST</sup> (The Province will subsidize \$100<sup>+HST</sup> **so your cost is \$50<sup>+HST</sup>**)

**(Net cost of both visits is \$150 + HST)**

5. Within **90-120 days** you should receive your grant based on the eligible upgrades performed.

Upgrade	Provincial Grant
85% Energy Star oil boiler	<b>\$750</b>
85% Energy Star oil furnace	<b>\$375</b>
